# HRSI//ORI Data Management

The application supports auto-tiling & WMTS server hosting for any HRSI/ORI data

- Simple drag and drop ORI of any size
- Platform will automatically archive and create a Web-GIS viewer
- Will auto generate tiles for all zoom levels dynamically at scale
- Can support peta-byte scale data without losing performance, Also supports Aerial imagery
- Auto generate WMTS/WMS endpoints for each Village/ORI
- Can store all Drone project files such as raw jpegs, SHP data, GCP as well as final ORI
- ORI generation process from raw imagery can be integrated (WebODM)
- Customization to directly meet the needs of APSSLR Land Records project

# ORI Data Management – Sample Images

A screenshot of a web-based data management interface. At the top, there is a header with a back button, a refresh button, and a URL bar containing the address "https://ori.geovista.in/r/sample-ori-data/". The header also features the Geovista logo on the left and a search icon on the right. Below the header is a toolbar with icons for "Files" (selected), "Map", and other functions. The main area is divided into two sections: a file list on the left and a preview area on the right. The file list shows a folder named "Bng" containing several files: "SOI\_KA\_transparent\_mosaic\_group1.prj", "SOI\_KA\_transparent\_mosaic\_group1.tfw", "SOI\_KA\_transparent\_mosaic\_group1.tif", "SOI\_KA\_transparent\_mosaic\_group1.tif.aux.xml", and "SOI\_KA\_transparent\_mosaic\_group1.tif.ovr". The preview area shows a 3D terrain model and five corresponding file icons below it, each with its name: "SOI\_KA\_transparent\_mosaic\_group1.prj", "SOI\_KA\_transparent\_mosaic\_group1.tfw", "SOI\_KA\_transparent\_mosaic\_group1.tif", "SOI\_KA\_transparent\_mosaic\_group1.tif.aux.xml", and "SOI\_KA\_transparent\_mosaic\_group1.tif.ovr".
